FORUM 2018
JUNE 27-29
LARGE-SCALE AGRICULTURE

IAMO Forum 2018
Large-scale agriculture -
for profit and society?

27 - 29 June 2018
Halle (Saale) | Germany

www.iamo.de/forum/2018

Background

In recent decades, new agricultural business models have emerged in a number of transition, emerging and developed economies. The main characteristics of these business models include a very large size of operations that sometimes reaches more than one hundred thousand hectares of farmland, integration of multiple stages of production and processing, and entry of the investors that often have no background in primary agriculture.

The conference's main geographical focus is on the transition countries of Central and Eastern Europe, Central and East Asia and developed and emerging economies in Western Europe, America and Australia.

The IAMO Forum 2018 is jointly organized by the Department of Structural Development of Farms and Rural Areas of IAMO, DLG e.V. and the Association Ukrainian Agribusiness Club (UCAB). The conference is funded by the German Research Foundation (DFG) and the Leibniz ScienceCampus „Eastern Europe – Global Area“ (EEGA).

Conference Structure

Day 1. The (re-)emergence of large scale agriculture: Drivers and determinants

- Institutional framework and structural preconditions;
- Structural change in agriculture;
- Competition on factor and output markets;
- Concentration processes and market power in modern supply chains;
- Impacts on producers and societal welfare.

Day 2. Can large-scale agriculture address stakeholder interests?

- Corporate governance; Operational transparency;
- Corporate social responsibility and business ethics;
- Environmental implications and challenges.

Day 3. Perspectives and challenges for large-scale agriculture

- Efficiency and productivity;
- Access to finance; Risk management;
- Human resource management;
- Welfare and distributional justice in rural areas.

The IAMO Forum 2018 provides a platform for research that investigates the economic, managerial and social aspects of large-scale agriculture as well as institutional frameworks that enable the persistence of large agricultural enterprises.
